10.6 Circumference and arc length

EASY

Learning intention We are learning to find circumferences, arc lengths and perimeters of curved shapes.

Success criteria
- ☐ I can use $C = \pi d$ or $C = 2\pi r$ to find a circumference
- ☐ I can find an arc length: $\theta \div 360 \times 2\pi r$
- ☐ I can find the perimeter of sectors and composite shapes

NOTES

Copy what your teacher writes on the board.

Date _____

WE DO

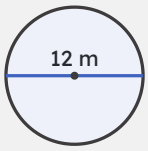

With your teacher: copy what they write on the board.

Example 1 Find each circumference or perimeter, correct to one decimal place.

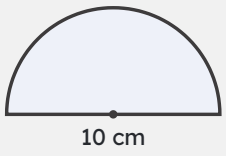

a Circumference

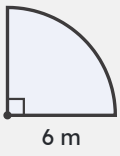

b Circumference

c Perimeter

d Perimeter

YOU DO

On your own: work down the box, one round at a time. Show your working.

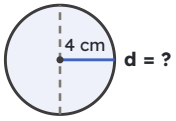

8 QUESTIONS

REMEMBER $d = 2r \cdot r = d \div 2 \cdot C = \pi d \cdot$ Use the π key, then round to one decimal place.

ROUND 1

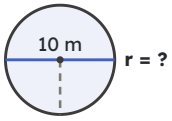

Questions 1–4: find the diameter or the radius.

1

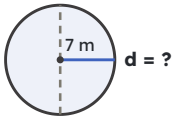

Formula d = 2r
Substitute _____
Answer _____

2

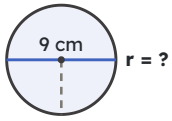

Formula r = d ÷ 2
Substitute _____
Answer _____

3

Formula d = 2r
Substitute _____
Answer _____

4

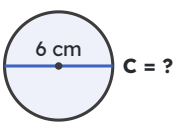

Formula r = d ÷ 2
Substitute _____
Answer _____

ROUND 2

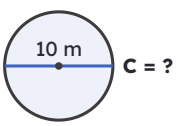

Questions 5–8: find the circumference. The diameter is given.

5

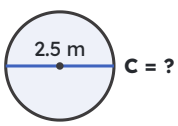

Formula C = πd
Substitute _____
Answer _____

6

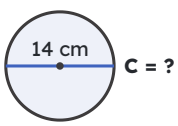

Formula C = πd
Substitute _____
Answer _____

7

Formula C = πd
Substitute _____
Answer _____

8

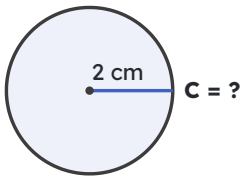

Formula C = πd
Substitute _____
Answer _____

YOU DO On your own: keep going, one round at a time. Show your working. 12 QUESTIONS

REMEMBER C = 2πr = πd · Semicircle P = ½πd + d · Quadrant P = ¼ × 2πr + 2r · Find d first when r is given.

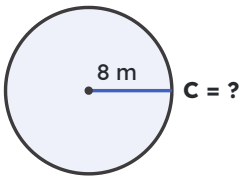

ROUND 3 Questions 9–11: find the circumference. The radius is given.

9

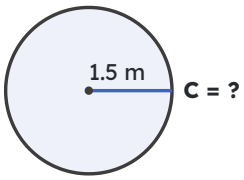

Formula C = 2πr
Substitute
Answer

10

Formula C = 2πr
Substitute
Answer

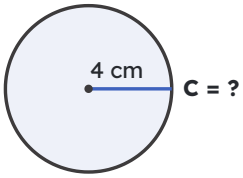

11

Formula C = 2πr
Substitute
Answer

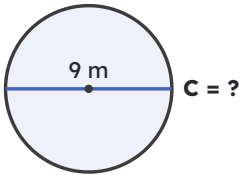

ROUND 4 Questions 12–14: is it r or d? Write the right formula, then find the circumference.

12

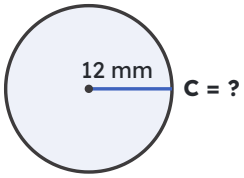

Formula
Substitute
Answer

13

Formula
Substitute
Answer

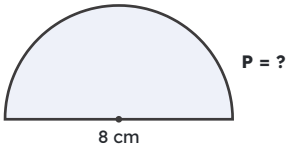

14

Formula
Substitute
Answer

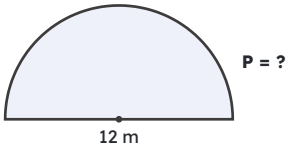

ROUND 5 Questions 15–17: find the perimeter of each semicircle.

15

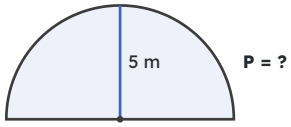

Formula P = ½πd + d
Substitute
Answer

16

Formula P = ½πd + d
Substitute
Answer

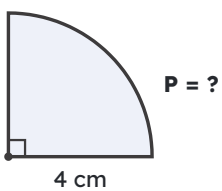

17

Formula P = ½πd + d
Substitute
Answer

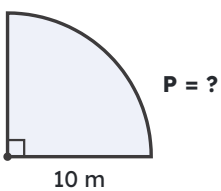

ROUND 6 Questions 18–20: find the perimeter of each quadrant.

18

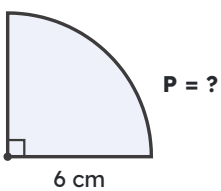

Formula P = ¼ × 2πr + 2r
Substitute
Answer

19

Formula P = ¼ × 2πr + 2r
Substitute
Answer

20

Formula P = ¼ × 2πr + 2r
Substitute
Answer

10.6 Circumference and arc length

MEDIUM

WE DO With your teacher: copy what they write on the board.

Example 2 **Give each answer correct to one decimal place.**

a Arc length

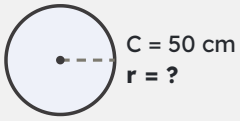

b Perimeter of the sector in part a

c Perimeter

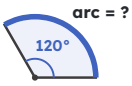

d Radius

YOU DO On your own: work in order. A tag shows an earlier lesson. Show your working. 9 QUESTIONS

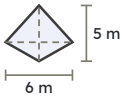

REMEMBER Arc = θ ÷ 360 × 2πr (θ = angle at the centre) · Sector P = arc + 2r · Composite: add the outside edges only

1 Arc length

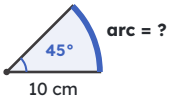

Formula _____
Substitute _____
Answer _____

2 Area 10.5

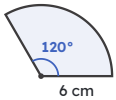

Formula _____
Substitute _____
Answer _____

3 Arc length

Formula _____
Substitute _____
Answer _____

4 Perimeter

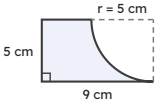

Formula _____
Substitute _____
Answer _____

5 Perimeter

Formula _____
Substitute _____
Answer _____

6 Perimeter

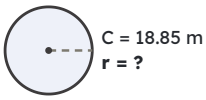

Formula _____
Substitute _____
Answer _____

7 Write the limits of accuracy of 4.5 m. 10.2

_____

8 Radius

Formula _____
Substitute _____
Answer _____

9 Percentage error of 20 cm, to the nearest cm? 10.3

Formula _____
Substitute _____
Answer _____

WORDED PROBLEMS Draw a diagram if it helps, then solve. Show your working. 3 PROBLEMS

1 A round garden bed has a diameter of 3.2 m. Edging costs $12 per metre. Find the cost to edge the bed, to the nearest dollar.

Answer _____

2 A bike wheel has a radius of 33 cm. How many full turns does it make to travel 1 km?

Answer _____

3 A running track is a rectangle 84 m long with a semicircle on each end. Each semicircle has a diameter of 64 m. Find one lap, to the nearest metre.

Answer _____
